Kito User Manual - Page 1: Overview

Kito is an autonomous warehouse robot made by Nova Robotics.
Maximum load: 120 kg.
Maximum speed: 1.5 metres per second.
Battery life: about 8 hours of normal work.
Full charge time: 90 minutes at the Kito Dock.
Weight of the robot itself: 65 kg.

Kito User Manual - Page 2: Safety

The red emergency stop button is on top of the robot.
Pressing it stops all motors immediately.
The lidar sensor detects obstacles up to 3 metres away.
Kito slows down when an obstacle is closer than 1.5 metres
and stops completely at 0.5 metres.
Never stand on the robot or use it to carry people.

Kito User Manual - Page 3: Maintenance and error codes

Check the wheels every 500 working hours.

Clean the lidar sensor once a week with a dry cloth.

Error E12: battery overheating. Stop the robot and let it cool for 30 minutes.

Error E31: lidar sensor blocked. Clean the sensor and restart the robot.

Error E47: wheel motor fault. Contact Nova Robotics support.
